

2nd Indo-US Workshop on Emerging Accessibility Technologies for the Blind and Visually Impaired (BVI)

Call for Participation

Indian Institute of Technology Delhi, India

February 11th - 13th , 2016

www.assistech.iitd.ernet.in/indo-us-workshop

Background

For people with visual disabilities, the world of digital information can be difficult or nearly impossible to access, navigate and use constructively. As educational and professional knowledge management processes in science, technology, engineering and math (STEM) become predominantly or even exclusively digital, there is an urgent need to develop technologies that facilitate seamless and intuitively responsive use of this knowledge for the BVI.

This Workshop seeks to bring together educators, researchers and industry partners devoted to innovative solutions for digital knowledge accessibility and management for the BVI. The goal is to develop future collaborations with organizations globally.

Program Agenda

- Invited talks
- Technical sessions
- Panel discussions
- Interactive sessions
- Future collaboration opportunities

Registration

For registration, please send the following information by **January 31st , 2016** to Ms. Richa Gupta : richa.gupta@cse.iitd.ac.in
Your Name, Position title, Organization Name, Email Address, Phone Number
